DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 17-20, drawn to a method for receiving transaction data and providing an individual to assist with the transaction, classified in class 705, subclass 35.
- II. Claims 14-16, drawn to a printed transaction record, classified in class 705, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Group I and Group II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the printed transaction record of Group II (claims 14-16) can be made and used by different methods than those claimed in Group I (claims 1-13 and 17-20) as such, requirement (2) as stated above is fulfilled and the inventions are considered distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Joe Born on July 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
